

Resources

The Healthysd.gov website, <http://www.healthysd.gov>, offers a wealth of information for patients and health professionals. A card with the website address is enclosed in the front pocket of this binder. Additional copies of the card can be ordered to give to patients. The website also has online Healthy Challenges several times per year.

A wide variety of educational materials is available from professional organizations, commercial companies, and others. Select materials that fit the needs of your patients in reading level and cultural issues. A pamphlet that is appropriate for one patient may not be for another.

The following items on healthy eating and physical activity are available from the South Dakota Department of Health (DOH). Items may be printed and reproduced or may be ordered at no charge from the [DOH Online Resource Center](#). Use [ADOBE](#)
